

TOPIC-21 KoM 03 March 2017

Agenda

1. Introduction and general information: SCs
2. Proposal for AUG experiments from participant
 - (a) Daniel Carralero *Advanced measurements of filamentary transport in the SOL*
 - (b) Zhang Wei *Interaction of blobs and radio-frequency convection*
 - (c) Ken McClements *Studies of particle acceleration during ELMs in MAST-U and AUG*
 - (d) Jose Vicente *Poloidal asymmetry (LFS-HFS) of turbulence and magnetic configuration effects on turbulence and filamentary transport*
 - (e) Nicola Vianello *Cross-machine studies of shoulder formation*
3. Experimental Shot Plan and Diagnostic SCs
4. General Discussion

Connection details
